

NGUYỄN LÊ KHÔI

Frontend Developer

I am a freshman at FPT University. Currently, I am majoring in software engineering. During my studies, I have access and practice the necessary skills through projects. therefore acquiring important skills in the field of information technology

SKILLS

Tech Skill

- **Frontend:** React, Next.js, React Native, HTML, CSS, JavaScript, TypeScript.
- **Backend:** Node.js, Nest.js.
- **Database:** MongoDB, MySQL.
- **Tools:** Git, Docker, Postman, Figma, Jira, SourceTree

Personal achivement

- letls: 6.0

EXPERIENCE

Software Engineering

FPT University

2023 – 2026

Intern FPT Software Academy

08/2024 – 12/2024

During my 3-month internship at FPT Software Academy, I worked as a Frontend Developer, contributing to internal web applications using React.js, JavaScript, and CSS. I collaborated with the team in an Agile environment, participating in Scrum meetings and sprint activities, while implementing user interfaces and integrating APIs. This hands-on experience not only improved my technical skills in frontend development but also strengthened my problem-solving, debugging, and teamwork abilities, giving me valuable insight into professional software development practices.

PROJECT

Sell and Trade BlindBox Platform

- **Tech Stack:** React, React Router, TailwindCSS, Axios, Vite, Vercel, Expo
- **Role:** In this project, I was responsible for building the Collection page, Detail page, and Trading page on the web platform, while also developing a dedicated mobile app using Expo to extend core features for mobile users. I integrated APIs for account management and authentication, ensuring secure and smooth trading experiences across platforms.
- **Outcome:** Successfully deployed on Vercel: blindbox-vn.vercel.app
- **Repo:** <https://github.com/giangndse183728/BlindBox-FE>

Smoking Cessation Support Platform

- **Tech Stack:** React, React Router, Material UI, TailwindCSS, Axios, Vercel, Expo
- **Role:** My contributions included developing the Quit Plan feature, implementing the Membership system, and building the Admin dashboard for managing users and monitoring activities. In addition to the web platform, I developed a mobile app with Expo to provide users with accessible and consistent tools to support their cessation journey.
- **Outcome:** Fully deployed frontend available on Vercel: fe-smoking-cessation-support-platfo.vercel.app
- **Repo:** <https://github.com/NguyLeKhoi/FE-Smoking-Cessation-Support-Platform>

Vestige-Platform

- **Tech Stack:** Next.js, React, TailwindCSS/Material UI, Axios, Vercel
- **Role:** In this project, I took charge of the Admin dashboard, creating tools for order management, post approval, and financial tracking, as well as building a dedicated Shipper page to handle delivery operations. I also contributed to performance optimization and data handling with React Hooks and Context API.
- **Outcome:** Successfully deployed on Vercel: <https://vestigehouse.vercel.app>
- **Repo:** <https://github.com/giangndse183728/Vestige-Platform-FE>

Portfolio

- **Tech Stack:** React, Vite, Vercel
- **Role:** Developed a personal portfolio website to showcase projects, skills, and experiences. Designed a clean and responsive UI with smooth animations and timeline layouts for experience and education. Implemented reusable components, section-based navigation, and project highlights integrated with external repositories.
- **Outcome:** Successfully deployed on Vercel: <https://portfolio-tawny-psi-93.vercel.app/>
- **Repo:** <https://github.com/NguyLeKhoi/portfolio>
